Artist-in-Residence Programs

Music for Many Inc. residencies provide a series of hands-on, sequential, grade appropriate classroom workshops for grades Pre K- 12. Though the subject may be similar, the workshop contents are adapted by the artist in response to the maturity level of the classrooms involved. Workshops are taught by professional artists who have a long history of working with children and excel in their field.

Through the arts we embellish and enhance the school curriculum. Each program is custom designed in order to meet the needs of the particular population that we are working with (ESL, Special Education, Early Childhood, Gifted, and Mainstream).

Our residencies make connections to the historical and social context of a specific time and/or culture. They build upon the relationship between the arts and the Social Studies core curriculum.

Staff Development (when it relates to student services)

Teaching artists offer grade appropriate workshops for teachers whereby we will provide tools (curriculum materials) and techniques so that teachers will feel empowered to use the strategies that our teaching artists model. We give teachers concrete tips and ideas to connect the arts to the various curriculum areas. We focus upon methods by which teachers can develop ways to stimulate learning through the arts. We want teachers to learn there are no wrong answers in the arts and that exercising the imagination, creative thinking and problem-solving supplement academic achievement.
